

Corporate Profile

Industrial engineering, fabrication and installation solutions for production-critical facilities.

HURLAG TECHNOLOGIES LIMITED

Lagos, Nigeria | www.hurlag.com | projects@hurlag.com

EXECUTIVE OVERVIEW

Engineering capability with field-tested delivery discipline

Hurlag Technologies Limited is a Nigerian industrial engineering, fabrication and installation company serving production-critical facilities across manufacturing, FMCG, breweries, bottling, oil and gas, energy, telecoms and commercial infrastructure.

20+ Years in industrial piping, fabrication and installation	40+ Named Nigerian and international clients	500+ Completed and ongoing project environments	Lagos Head office, fabrication yard and warehouse base
--	--	---	--

The company combines engineering design support, procurement, fabrication, installation, quality assurance and handover coordination. Its teams include registered engineers, technicians, QA/QC managers and HSE personnel experienced in internationally supported projects and multinational plant environments.

This redesigned corporate profile consolidates the draft material into a modern client-facing document: clear capability statements, selected project evidence, client references, asset capacity, facility context, leadership and contact information.

What Hurlag Does EPC support, process piping, tank fabrication, equipment installation, structural works, insulation, fire protection, electrical installation and telecom/solar fabrication.	How Hurlag Works Survey, design review, materials planning, fabrication, installation, testing, commissioning support and practical handover documentation.
Quality Mindset Pressure testing, inspection-ready installation, international code awareness and QA/QC oversight for site-critical systems.	Client Context Long-standing work across bottling, breweries, food and beverage, FMCG, oil and gas, energy and utility infrastructure.

INDUSTRIAL SERVICES PORTFOLIO

Capabilities

Mechanical, electrical, structural and safety systems delivered for active industrial environment

CORE SERVICES

Integrated engineering, fabrication and installation services

Engineering, Procurement and Construction

Detailed engineering support, materials procurement and construction coordination to deliver functional assets and facility systems.

Pipe Fittings and Welding

Gas lines, process piping, utility piping, TIG welding, arc welding, HDPE butt fusion and electro-fusion welding.

Fire Protection Systems

Conceptual fire-water design support, hydraulic calculations, fire water tanks, pump sets, hydrants, risers, sprinklers and alarm infrastructure.

Tanks and Vessels

Design, procurement, fabrication and installation of mild steel, stainless steel and carbon steel tanks, including tank farm pipe tie-ins.

Structural Works

Structural staircases, trusses, warehouses, platforms, supports and access structures for operational facilities.

Electrical and Control Support

Electrical panel support, power distribution, controls, instrumentation, containment, cabling and utility-section installations.

Hot and Cold Insulation

Pipe, vessel and equipment insulation, aluminium cladding and energy-control work for industrial process environments.

Telecom and Solar Fabrication

Support structures, enclosures and site fabrication for telecom infrastructure and hybrid power environments.

Hurlag's technical teams are accustomed to bottling, brewery, FMCG, oil and gas and utility standards, with installation work planned around uptime, access, safety and maintainability.

SELECTED PROJECTS

Representative landmark project experience

Client / Project Environment	Scope	Period / Notes
Guinness Ogba Brewery	Brewhouse and process area upgrade with GEA Germany	2010
SABMiller Brewery	Greenfield brewery equipment installation, pipeworks and insulation	2012
Nigerian Bottling Company	Combined heat projects, fire protection systems and PET line installations across multiple plants	2009 to date
Consolidated Brewery	Facility upgrade, refrigeration and CO2 plant installation	2012 to 2013
Brasserie BB Lome, Togo	Mechanical and electrical installation of refrigeration plant, brewhouse and utilities upgrade	2012 onward
7Up Bottling Company	Bottling line piping, insulation and plant upgrades at Ikeja, Aba, Kano, Enugu, Benin and Ibadan	2009 to 2015
Guinness Nigeria Plc	Waste water treatment plant mechanical installation with Waterleau BV	2013
Dangote Sugar, Apapa	Sandwich panel installation for sugar bagging hall	Project record
International Breweries Plc, Ilesa	ND 315mm raw-water conveyance main from ESA ODO	Project record
Nestle Nigeria Plc, Agbara	Fire infrastructure project	Project record
Flex Films PVT, Sagamu	Mechanical, electrical, utility, instrumentation and insulation installation	Project record

SECTOR REACH

Industries served

Breweries and Bottling

Brewhouse upgrades, process piping, PET lines, refrigeration, utilities, fire protection and plant maintenance.

FMCG and Manufacturing

Production lines, stainless process equipment, tanks, pipework, insulation, structural supports and electrical support.

Oil and Gas / Energy

Gas line evaluation, equipment installation, mechanical works, utility systems and site support.

Food and Beverage

Hygienic process installations, utility upgrades, fire infrastructure and fabrication support.

Telecommunications

Fabrication support for telecom site infrastructure, enclosures and renewable power-related structures.

Water and Utilities

Raw-water conveyance, pipe networks, tanks, pump systems and maintenance-ready service infrastructure.

Pump-room and pipework installation

Raw-water and process tank fabrication

Pipe welding and repair execution

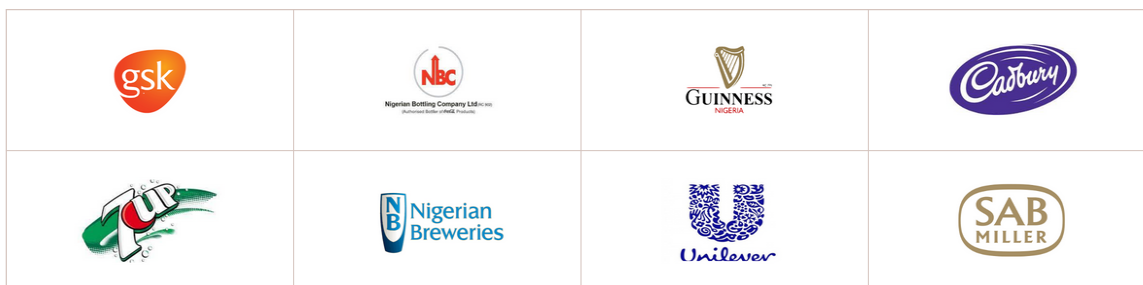

Fire protection systems and safety infrastructure

CLIENT PORTFOLIO

Trusted by Nigerian and international industrial brands

The draft profile lists a broad clientele across breweries, bottling, FMCG, food, engineering systems, utilities and regional African operations.

GlaxoSmithKline Nigeria Plc	Consolidated Breweries Plc	Kimberly Clark SSA
Nigerian Bottling Company Plc	PZ Cussons Plc	Olam Nigeria Limited
Guinness Nigeria Plc	WAMCO Plc	Dangote Sugar Refinery Plc
Cadbury Nigeria Plc	Nestle Nigeria Plc	Krones LCS Center West Africa
7Up Bottling Company Plc	International Breweries Plc	ABInBev Africa
Nigerian Breweries Plc	GEA Process System	Nile Breweries Uganda
Unilever Nigeria Plc	Waterleau B.V.	Zambia Breweries
SABMiller Breweries	Brasserie BB Lome	Flex Film Sagamu

EQUIPMENT AND ASSETS

A practical asset base for fabrication, installation and site support

The original asset register spans welding, cutting, drilling, rigging, electrical, civil and insulation equipment. The redesigned profile summarizes that capacity in a readable client-facing form.

Asset Category	Representative Equipment / Capacity	Operational Use
Welding and pipework	Argon/TIG welding machines, arc welding machines, automatic welding machines, butt-fusion and electro-fusion welding systems	Stainless, carbon steel, HDPE and process pipe execution
Cutting and preparation	Angle grinders, Axxair/Orbitec/GF cutting systems, pipe cutters, bevelers, plasma cutters, band saws	Pipe and steel preparation for controlled fabrication
Drilling and fastening	Portable drills, magnetic drills, impact wrenches, polishing machines, pillar drills	Installation, supports, finishing and maintenance work
Rigging and lifting	Forklifts, scissor lifts, chain blocks, beam clamps, jacks, rollers, tirfor jacks, webbing slings and shackles	Equipment ingress, heavy installation and safe handling
Electrical tools	Electrical panels, crimping tools, multimeters, phase sequence testers, voltage testers and electrical toolboxes	Electrical installation, testing and utility support
Civil and safety support	Concrete mixers, compactors, jack hammers, laser levels, gas testers, breathing apparatus and confined-space kits	Civil support works and controlled site access
Insulation tools	Rivet pliers, sealant guns, snips, rolling machines, swaging machines, scaffold, ladders and cladding tools	Hot/cold insulation and aluminium cladding execution

1,200+ Argon gas cylinders listed in draft register	300+ Welding machines, toolkits and related welding accessories	100+ Rigging, lifting and access equipment entries	Wide Mechanical, electrical, civil and insulation tool coverage
---	---	--	---

FACILITIES

Head office, fabrication yard and warehouse support

The draft profile identifies Hurlag's head office and fabrication yard/warehouse capacity around Lagos and Ogun State, supporting material staging, fabrication, storage and project mobilization.

Industrial installation environment

Structural fabrication and frame works

Electrical installation and control support

Thermal insulation and cladding

LEADERSHIP AND STAFF STRENGTH

Experienced engineering and operations leadership

Name	Role	Profile Summary
Dr. Engr. Olasoji R. Olagunju	Managing Director / CEO	Mechanical engineer, PhD holder, FNSE and COREN-certified leader with long project experience before founding Hurlag Technologies Limited in 2000.
Mrs. Grace O. Olagunju	Finance Director	Board-level finance oversight and corporate administration support.
Engr. Oladele Olufade	General Manager	Electrical engineer with MBA, MNSE, COREN and GPP(UK) credentials; joined Hurlag in 2002 and leads operations.
Engr. Ibrahim Z. Olanrewaju	Deputy General Manager	Mechanical engineer with project-management training and broad industrial project experience across bottling, breweries and FMCG.
Engr. Oyebode Ogunsua	Assistant General Manager	Mechanical engineer and COREN-certified project leader with experience in industrial services and plant projects.
Engr. Ayodeji Arajulu	Operations Manager	Mechanical engineer with project, materials and field-team coordination experience.

The management team is supported by project managers, QA/QC managers, safety managers, senior design engineers, HR, accounts, inventory, logistics and equipment-management personnel.

QHSE AND PEOPLE DEVELOPMENT

Safety, quality and continuous training

Hurlag's project delivery approach emphasizes pressure testing, valve and fitting verification, inspection readiness and handover coordination under client supervision. The draft training record highlights recurring investments in management capability, project management, health and safety, welding, fitting and sprinkler installation skills.

<p>Quality Assurance</p> <p>QA/QC oversight, pressure testing above working pressures, installation verification and client-supervised test runs.</p>	<p>Health and Safety</p> <p>Project health and safety training, confined-space equipment, gas testing and controlled site execution practices.</p>
<p>Technical Training</p> <p>In-house training in welding techniques, fitting techniques and fire sprinkler installation for technical teams.</p>	<p>Management Development</p> <p>Managerial skills acquisition and project-management training for management staff, project managers and engineers.</p>

Training Area	Audience	Duration
Managerial skill acquisition	Management staff	2 days
Project management - Microsoft approach	Project managers and engineers	5 days
Health and safety management	Management staff	3 days
Welding techniques	Technicians	3 days
Fitting techniques	Technicians	3 days
Fire sprinkler installation	Engineers	4 days
